

KNOW THE NAMES

Add the name into the description below

Laptop Computer Smart Phone Desktop Computer Tablet

_____ are big computers that need to be plugged into power and are designed to sit in one place.

_____ are small enough to carry around, and can run on batteries. Laptops have keyboards and track - or touch - pads.

_____ are even smaller than laptops, being about the size of a book. They also run on batteries. Tablets are mostly controlled by a using a touchscreen.

_____ are small enough to fit in your pocket and can be used to make phone calls. Smartphones are also mostly controlled by touchscreens.

DRAW YOUR LAPTOP

Draw your device below and label the important parts with the related number

1. The screen - The screen shows what's happening on the computer, and is built into the lid of the laptop.

2. The keyboard - Just like on a desktop computer, a keyboard is used to type in numbers and letters.

3. The touchpad - Unlike a desktop, a laptop computer does not have a mouse. Instead, it comes with a touchpad, which does the same job as a mouse.

4. The web camera - This is used for video chatting.

5. The speakers - These are used to make sound.

6. Power button - a laptop has a power button to turn it on and off. It is usually just above the keyboard, and will generally have the power button symbol on it.

7. Charging port - This is where you plug your laptop in to charge. Look for the battery indicator on the top left or bottom left of the screen (it looks like a battery) to know when you need to charge.

8. _____
(write your own extra label)
